DETAILED ACTION

Allowable Subject Matter

Claims 1-13 and 46 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's arguments dated 9/6/05 are considered persuasive because Ballantine teaches to nitride the interfacial dielectric prior to the formation of the high dielectric material and therefore does not teach nitriding the high dielectric material. Prior art fails to teach the limitations of claim 1 in combination with a nano laminate as claimed, claims 2-13 depend from claim 1 and act only to further narrow the allowable subject matter. Claim 46 also requires the formation of a nano laminate and contains all the allowable subject matter of claim 1 but further requires that the layers are formed from ALD. Consequently, the claims are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
